

Fundamental Principles for success

- **Describe your values and vision**
- **Analyse situational issues in line with our set objectives (SWOT)**
- **Create & maintain clear procedures and milestones**
- **Educate, mentor and brief all the stakeholders**
- **Improve leading systems with clear procedures**
- **Supervise, monitor & evaluate all activities**

Fundamental Principles for success

- **Describe our values and vision**

“ A Society free from social injustice.”

- **Analyse situational issues in line with our set objectives (SWOT)**

Fundamental Principles for success

- Create & maintain clear procedures and milestones through the following ways;
 - ❖ Identify & meet with all the stakeholders. That is; those who have a vested interest in either the movement or its outcome
 - ❖ Set & prioritize your goals.
 - ❖ Define deliverables/output/results; Develop a list of all deliverables, make sure all team members are familiar with this list.
 - ❖ Create the schedules
 - ❖ Set progress reporting guidelines; These can be monthly, weekly, or daily reports.

Fundamental Principles for success

- **Educate, mentor and brief all the stakeholders**
 - Holding meetings
 - Organising education seminars, workshops & Spiritual retreats
 - Refresher courses
 - Short courses/ Ongoing formation
 - Effective and Efficient planning and Management.

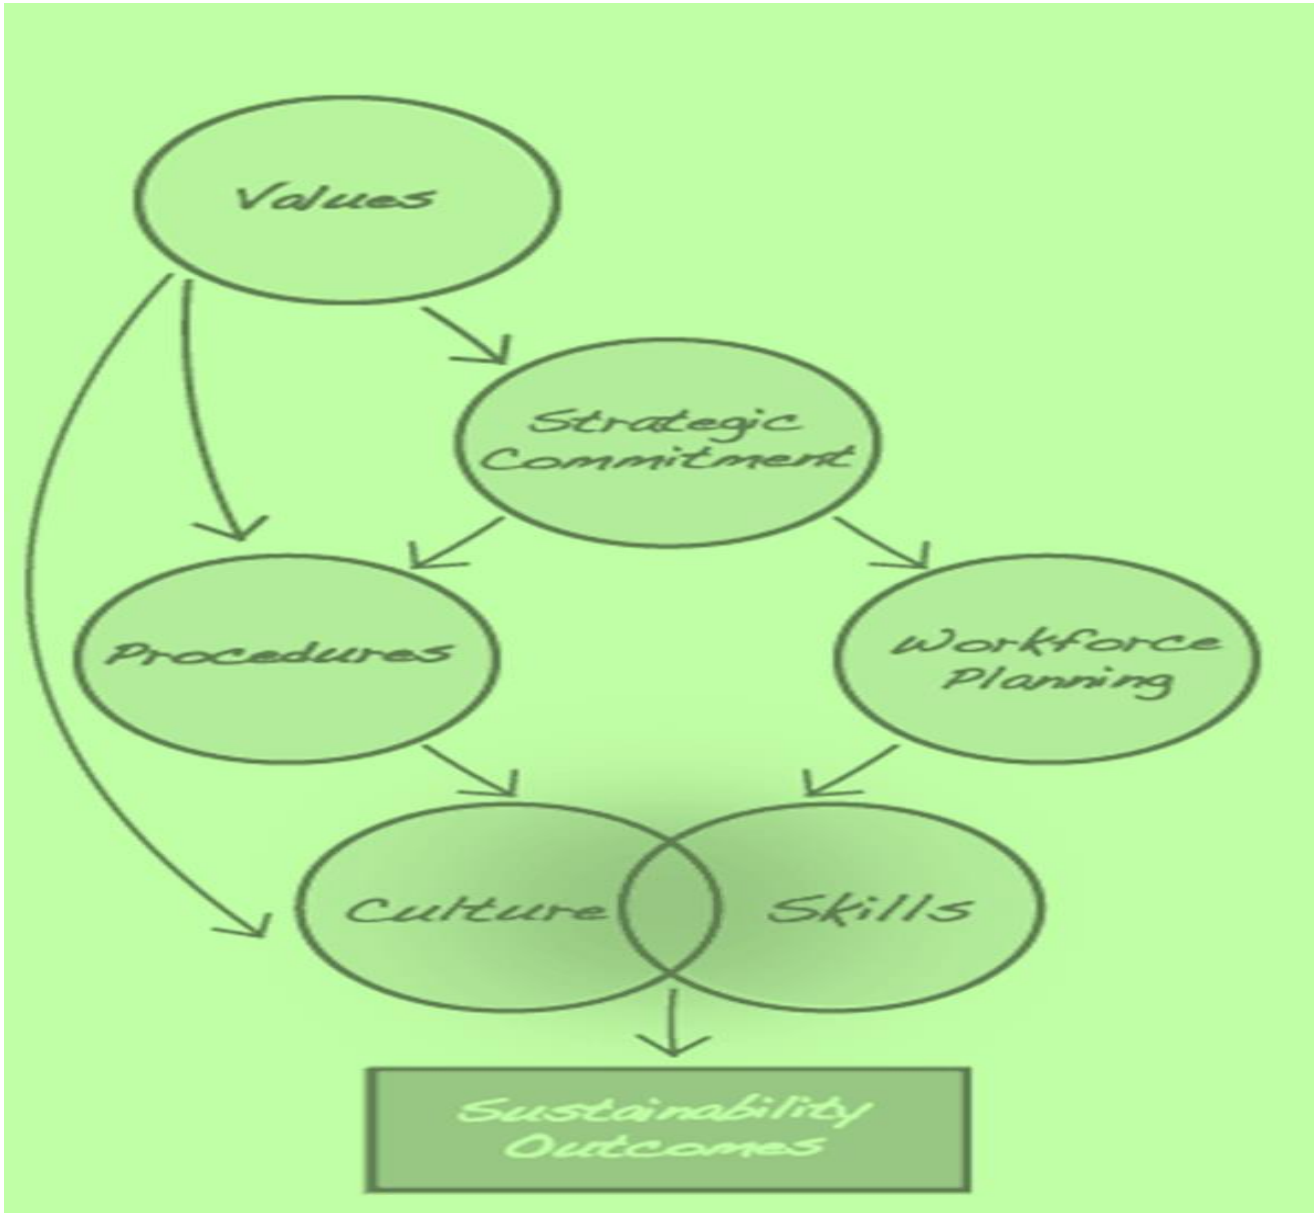

Fundamental Principles for success

- **Improve leading systems with clear procedures**
 - ❖ CWM needs to adopt policies and procedures.
 - ❖ Simply put, well-written policies and procedures and allow stakeholders to participate, clearly understand and internalize them.
 - ❖ This requires commitment of stakeholders to apply the procedures and management allocate respective duties. When procedures are not followed the effect is like a sabotage.
 - ❖ Build on continuous improvement systems and ensure that staff/members are motivated and maintained.
 - ❖ Input of staff/members is essential. They are likely to have good ideas about how to reduce waste and increase efficiency. They are also more likely to follow procedures consistently when they have had a hand in designing them and really understand them.

Fundamental Principles for success

- Supervise, monitor & evaluate all activities

If all these principles are followed, then a lot of time, work and energy is saved for another useful assignment!!!!!!!

**You should
never give up!**
